Semen Collection

Semen analysis is a time-critical test | Appointments are **ESSENTIAL**

These instructions are also available in Chinese and Arabic on request

To arrange an appointment	<p>Please telephone 1800 111 483 to arrange an appointment for the test requested.</p> <p>If you have any questions regarding the collection instructions speak with your Doctor or the Andrologist (specialist reproductive health scientist) in our clinic.</p>
Collecting your sample	<ul style="list-style-type: none">• Do not ejaculate (via intercourse or masturbation) for 2 days prior to providing the semen sample. But please ensure your last ejaculation was no longer than a week ago.• Do not pass urine during the half hour immediately prior to collecting the sample.• Do not collect by withdrawal intercourse.• Do not use oil-based lubricants or standard condoms, as they can kill sperm.• Do not refrigerate or let your sample become hotter than body temperature.• Use the sterile specimen container provided by the doctor or laboratory (or buy a sterile, 60ml container from the chemist).• Label the jar with your name, date of birth, and the time and date of collection.• Collect the ENTIRE sample by masturbation, especially the first few drops.• Check that the lid of the container is screwed on firmly, and placed in a specimen bag (or a plastic bag).• You or your partner can deliver it to the laboratory within ONE hour of collection if collected at home. Most men prefer to collect at home where the conditions are most favourable.• If you live further than an hour's travel time away, it is possible to collect the sample at our clinic.
Special circumstances	<ul style="list-style-type: none">• In special circumstances, please telephone the laboratory. Special non-toxic condoms can be provided in advance to help with sample collections.• If "Retrograde Ejaculation" has been mentioned by your Doctor, please ring laboratory at least 2 days before producing sample, to ensure the instruction sheet can be sent to you.
At the clinic	<ul style="list-style-type: none">• Ask to see our scientist when you arrive at the clinic. You will be asked to complete a short questionnaire regarding the sample to help our assessment.
